2. REGISTER

Choose **Create Tracking Slip**. Enter the document details and priority. The document stays in your office until dispatch.

Select **Register & generate QR**. The code identifies the physical folder.

3. PRINT AND ATTACH

Print the routing slip, attach the QR label to the folder, and keep the tracking code visible. Reprinting keeps the same identifiers.

LGU DocTrack

LGU-2026-000001

Attach the printed QR slip to the physical folder.

The system tracks physical custody. Optional uploaded copies remain attached to the tracking record for reference.

Receive, move, finish

Use the QR scan at every handoff so custody and status stay accurate.

4. RECEIVE

When the folder arrives, open **Scan** and scan the QR label before accepting it. At the correct office, receipt is recorded automatically.

If the camera is unavailable, use the manual code entry. Check that the destination matches your office.

5. PROCESS + DISPATCH

Open the document from **My office** or the scanner queue. Use **In process / resume**, then choose **Dispatch** when ready.

Confirm the next office. Add remarks for a hold or return. A hold blocks dispatch until processing resumes.

6. COMPLETE + FILE

The office currently holding the document may select **Mark completed**, then enter the shelf, cabinet, or folder location and select **File to archives**.

7. SEARCH + TRACK

Use **Document registry** to search by code, title, requester, status, office, or type. Use **Notifications** for incoming and exception alerts.

Filing & archives

SAFE HANDLING RULES

Wrong office: stop and report the scan. Custody does not transfer.

Unknown QR: do not invent a record. Check the printed code and retry.

Network failure: retry only after the connection returns; reload to confirm the saved state.

Duplicate scan: keeping the QR in view does not create another action. Scan again only for the next handoff.

ROLE REMINDER

Receiving clerk: scan, receive, dispatch, and flag wrong-office scans. **Office staff:** register, receive, process, hold, return, complete, file, and track documents assigned to your office.
